

FIREWISE COMMITTEE REPORT SEPT. 7, 2021

- We are chipping away on Lot 1--Asbestos abatement is done and currently working on securing demolition permits. There are five hazardous trees to be downed after the demolition. One of them is in the lake now. We will pull out with the excavator during the demo and cut up at owner's expense with possible Firewise help.
- There are other dead or hazardous trees around the lake which will be dealt with this fall and winter. Two will be trimmed by Dan and I on Friday.
- The fire hydrant is on hold until spring, due to the length of time and the agencies involved in the permitting process
- Turn in hours worked on your property for this year by October. This includes raking, trimming, placing rock, thinning, burning ect.
- We will likely have a Firewise crew available in the spring
